Welcome
to Samson Pallet Stability.
We boast a dedicated team
of strapping tool and
machine engineers.

Scan here to watch
our videos.

Industry-leading

We have an industry leading
and experienced sales
team with over 50 years'
experience between them.

UK Major Stockist

We are one of the UK's
major stockists of Polyprop,
polyester and steel strapping
and related tools and
ancillaries.

Tool Rental

We offer tool rental including
a 'swap and drop' service, as
well as a strapping tool and
machine repair service.

Technical Advice

We offer a free advice
service with site visits to
customers if required.

Quality Guaranteed

All our strapping is of
guaranteed quality from
major manufacturers.

Dedicated Engineers

We have a hugely well-equipped
workshop with dedicated and
trained engineers and tool
technicians. Should clients wish
to, they are welcome to visit the
workshop.

Our Engineering Workshop and Tool Repair Department

First for Strapping Supply and Service

Based at our Sheffield site but offering UK-wide coverage, our Engineering Workshop has all the facilities needed to offer our customers a first-class professional service for all strapping tool and machine needs. We are also able to visit customers to carry out onsite inspections and repairs if necessary.

Our dedicated team of engineers and tool technicians are at our customers' disposal to help keep their businesses moving, whether for one-off repairs, breakdowns, or to provide the cover offered by our service or preventative maintenance contracts.

Bespoke preventative service and maintenance contracts available – please contact us discuss your requirements.

We also offer training to our clients' operators and other members of staff in the use and day-to-day maintenance of strapping tools and machines.

In addition, we have a comprehensive stock of spare parts. We are also more than happy to source strapping tools, machines and spare parts not in our standard range.

We take our strapping customers' business needs seriously, which is why we are the UK's premier strapping consultants.

Reduce

We advise clients how to reduce their consumption of packaging materials whilst still getting their goods to their destination securely and in perfect condition. This in turn reduces wastage of goods damaged in transit.

Recycled

To allow customers to avoid the plastic tax introduced in 2021, we are constantly increasing our range of products that contain at least 30% recycled materials.

Recycle

Many of our products are recyclable. Our consultants advise clients on the best way to recycle.

Our sister company, **Marmax Recycled Products**, turns recycled HDPE plastic into high quality outdoor furniture. For more information visit their website.

Scan here to view the Marmax website

Strapping

Samson Pallet Stability boast a dedicated **strapping specialist sales team, strapping tool and machine engineers.**

We have an industry leading experienced sales team offering specialist knowledge on all strapping applications.

Our team of service engineers offer in-house servicing in our fully equipped workshop.

Our extensive range of strapping tools and machines are available to rent or buy. We also offer an inspection and repair service for customer owned tools.

Our strapping specialists undertake a full site evaluation offering technical advice and support to improve costs and efficiency.

With over 130 years experience in the packaging industry, we will never compromise on quality.

We are one of the UK's major stockists of polypropylene, polyester and steel strapping plus related tools and ancillaries.

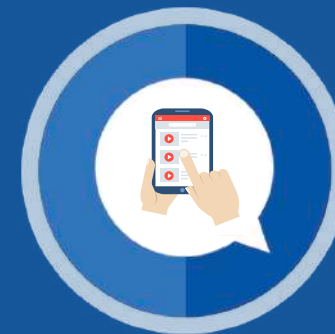

Steel Strapping

With the strapping of heavy goods playing such a big part in the transportation business, the main question that people tend to ask is; should we use PET or Steel strapping?

Smarter wrapping ensures pallets are wrapped safely

Slingshot 0.8G Test
Standard tip angle for forklifts and transportation

EU Compliant
Machine complies with highest quality and safety standards

When a client comes to us for pallet wrapping advice, we are able to offer complete solutions to their packaging requirements, saving waste, cost and space. To book a consultant to discuss your requirements **get in touch**.

Sheffield 0114 257 4470 | nano@samuelgrant.co.uk | toolingcontracts@samuelgrant.co.uk

Pallet testing

Our pallet testing laboratory is the only EUMOS certified centre for horizontal pallet load security testing in the UK.

Scan here for more info.

The Slingshot is the first of its kind to be installed in the UK and unique to us. The Samson Nano Slingshot replicates the inertia of a vehicle and whether the load will potentially displace. The machine can initially test at 0.1G and work up to the EUMOS standard of 0.8G. From the pallet data entered, the maximum deformation of the load is calculated to create a pass or fail.

Free packaging auditing service.

Companies wishing to review their packaging spends and packaging waste can invite one of our **specialists** in, consult on their requirements, and conduct a full audit of their current operation to see how they can save money and waste.

The factors to consider when auditing a company's packaging are extensive. From the purchase price and depreciation of equipment, to servicing and maintenance, to staff time, to costs for goods unsuccessfully wrapped and causing wastage, to costs of the products used, the list goes on.

Most companies conducting an audit through **Samuel Grant**, see a **significant reduction** in their packaging spends.

“Our mission is to listen, advise, and deliver optimum packaging solutions on time every time.”
